THE REPLY FILED 10 September 2009 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.							
1. The reply was filed after a final rejection, but prior to or on application, applicant must timely file one of the following rapplication in condition for allowance; (2) a Notice of Appe for Continued Examination (RCE) in compliance with 37 C periods:	eplies: (1) an amendment, affidavi al (with appeal fee) in compliance	t, or other evidence, w with 37 CFR 41.31; or	hich places the (3) a Request				
a) The period for reply expires 3 months from the mailing date b) The period for reply expires on: (1) the mailing date of this Adno event, however, will the statutory period for reply expire la Examiner Note: If box 1 is checked, check either box (a) or (I MONTHS OF THE FINAL REJECTION. See MPEP 706.07(Extensions of time may be obtained under 37 CER 1.136(a). The date of the content of the	dvisory Action, or (2) the date set forth ter than SIX MONTHS from the mailing b). ONLY CHECK BOX (b) WHEN THE).	g date of the final rejection FIRST REPLY WAS FII	n. LED WITHIN TWO				
Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). NOTICE OF APPEAL							
 The Notice of Appeal was filed on A brief in compl filing the Notice of Appeal (37 CFR 41.37(a)), or any exter Notice of Appeal has been filed, any reply must be filed wi AMENDMENTS 	sion thereof (37 CFR 41.37(e)), to	avoid dismissal of the					
3. The proposed amendment(s) filed after a final rejection, be (a) They raise new issues that would require further core (b) They raise the issue of new matter (see NOTE below (c) They are not deemed to place the application in bett appeal; and/or	sideration and/or search (see NOTw); er form for appeal by materially red	ΓE below); ducing or simplifying tl					
(d) ☐ They present additional claims without canceling a corresponding number of finally rejected claims. NOTE: (See 37 CFR 1.116 and 41.33(a)).							
4. The amendments are not in compliance with 37 CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324). 5. Applicant's reply has overcome the following rejection(s):							
 Newly proposed or amended claim(s) would be all non-allowable claim(s). For purposes of appeal, the proposed amendment(s): a) [·	•	-				
how the new or amended claims would be rejected is prov The status of the claim(s) is (or will be) as follows: Claim(s) allowed: Claim(s) objected to: <u>8 and 10</u> .	」 will not be entered, or b) ⊠ will ided below or appended.	i be entered and an e.	кріапаціон оі

	/Chat C. Do/ Primary Examiner, Art U	nit 2193					

Part 11: The applicant argues in pages 9-10 for claims that the proposed modification would render the prior art unsatisfactory for its inteded purpose since the secondary reference by Schier clearly states in its summary of the invention.

The examiner respectfully submits that the secondary reference by Schier is applied to only show the missing limitation "the multiplier is on a field programmable gate array and the second product is retrieved from a memory" from the primary reference rather than showing the limitation "scaling the stored value...from the second number". The limitation "scaling the stored value from the second number" is clearly showed by the primary reference Bhandal. The secondary reference only used to show the product of multiplication (e.g. can be previous) can be obtain directly from the look-up table for performance instead of performing direct multiplication to produce the result. Further, nothing in Schier would prevent to be combined with Bhandal from alternatively or additionally shifting after obtaining the product of multiplication.

The applicant further argues in pages 10-12 for claims that there is no motivation as "improving system performance" for combination since there is no need to add a further product from memory and also requiring the stored produt to be added, the multiplier in Bhandal would have its performance worsen not improve as stated by the examiner.

The examiner respectfully submits that it is conventionally known the product LUT is improvement over the direct multiplication (certain degree). By having one of the multiplications replace with direct lookup table to obtain the product would obviously improve over direct multiplication operation.
